Operations & Security Specialist

Versatile professional with **20 years of experience** in high-precision operations, regulatory compliance, and process management. Transitioning deep operational expertise into Cybersecurity, with a focus on threat mitigation, data integrity, and defensive operations. Currently executing advanced technical artifacts in **Network Analysis, Python Scripting, and Security Auditing. CompTIA Security+ (SY0-701) Exam Scheduled for June 4, 2026.**

Tactical Highlights

- **Security Operations:** Threat Detection, Incident Response, SIEM (Splunk/Chronicle), Log Analysis.
- **Network Defense:** Packet Analysis (Wireshark), Network Security Monitoring (tcpdump), Firewall Configuration.
- **Technical Stack:** Linux/Unix CLI, Python for Security Automation, SQL Data Querying.
- **Compliance & Risk:** NIST CSF, Risk Assessment, Security Auditing, Asset Management.
- **Operational Excellence:** 20 Years of High-Stakes Quality Control, Inventory Management, & Safety Compliance.
- **Methodology:** NIST Cybersecurity Framework (CSF) Application, Risk Assessment, Incident Documentation.
- **Professional Integrity:** Extreme Attention to Detail, Regulatory Adherence, Team Leadership, and Priority Management.

Experience

Head Meat Cutter / Operations Specialist

March 2022 to current

Kroger — Dallas, TX

High-Precision Operations & Safety Compliance Responsible for the technical execution and quality control of high-volume inventory production. Precision Execution: Maintain extreme attention to detail in high-pressure environments, ensuring every "output" meets strict specifications. Regulatory Compliance: Execute daily safety and health audits to meet federal and state standards—applying the same rigorous documentation mindset required for NIST and ISO security frameworks. Asset Management: Responsible for the secure handling and processing of high-value inventory, minimizing loss through systematic workflow monitoring. Currently bridging 5 years of operational reliability and "Zero-Error" standards into a technical Cybersecurity role.

Skills

Standards Compliance, Quality Control, Operations Management:

Expert implementation of local and federal regulatory mandates. Responsible for the continuous auditing of department workflows to ensure 100% adherence to safety and operational standards, maintaining a 'zero-violation' record through proactive risk management. Execution of high-precision inspection protocols for high-volume inventory production. Utilizes a systematic documentation approach to identify and mitigate anomalies, ensuring all 'output' meets rigorous specifications and systemic integrity standards. Strategic oversight of technical department workflows in a high-pressure environment. Focused on maximizing resource efficiency, ensuring operational continuity during peak demand, and leveraging precise data tracking to maintain departmental uptime and productivity.

Operations Specialist / Head Meat Cutter

June 2014 to March 2022

Tom Thumb — Dallas, TX

High-Volume Asset & Compliance Management. Managed specialized department operations with a focus on regulatory compliance and precision production in the high-demand North Dallas market. Compliance Auditing: Executed daily quality control checks to meet strict corporate and health safety standards. Inventory Logic: Responsible for high-value asset management, minimizing waste and ensuring supply chain efficiency. Operational Continuity: Maintained consistent "Zero-Error" output during high-pressure shifts and peak market cycles.

Skills

Standards Compliance, Quality Control, Inventory Management, Time Management,

Operational Excellence: Expertise in the development and enforcement of multi-unit operational standards. Responsible for ensuring total alignment with corporate governance and state regulatory requirements through systematic internal audits and process

validation. Management of comprehensive quality assurance programs across large-scale operations. Focused on the identification and remediation of procedural gaps to maintain peak product integrity and brand excellence. Strategic oversight of high-volume supply chains and asset allocation. Implemented precise tracking and logistics models to minimize shrinkage, optimize capital investment, and ensure consistent inventory availability. Advanced proficiency in prioritizing critical-path objectives in high-velocity environments. Proven track record of managing complex schedules and multi-departmental deliverables while meeting strict organizational deadlines. Leadership dedicated to systemic efficiency and continuous process improvement. Expert at optimizing departmental output and team performance to achieve top-tier business results and sustainable growth.

Market Manager (Promoted from Operations Lead)

May 2005 to June 2014

Kroger — Dallas, TX

Strategic Leadership & Multi-Unit Operations Rapidly promoted through the operational ranks—from Department Lead to Market Manager—overseeing high-level compliance and staff management. Market Manager: Directed departmental strategy, financial auditing, and large scale risk mitigation. Technical Foundation: Developed foundational skills in logistics, inventory control, and precision department management (Head Meat Cutter/Seafood Captain). Operational Leadership: Proven track record of managing complex workflows and meeting rigorous regulatory benchmarks.

Skills

Management, Leadership, Strategic Planning, Audit and Compliance, Problem Solving:

Extensive experience in cross-functional team leadership and departmental oversight. Proven ability to mentor personnel, optimize performance metrics, and maintain operational integrity across multi-unit business environments. Strategic leadership focused on fostering a culture of accountability and excellence. Expert at navigating organizational transitions and leading teams through high-pressure cycles while maintaining consistent output.

Adept at developing and executing long-term operational roadmaps. Skilled in resource allocation, data-driven decision making, and aligning departmental goals with broader organizational objectives. Rigorous oversight of financial and operational auditing processes. Expert at identifying systemic vulnerabilities and implementing corrective actions to ensure total adherence to complex regulatory frameworks. Advanced capability in identifying root causes of operational friction and implementing scalable solutions. Leverages analytical thinking and technical foundations to mitigate risks and resolve complex logistical challenges.

Education & Certifications -

CompTIA Security+ (SY0-701) | *Exam Scheduled: June 4, 2026*

Google Cybersecurity Professional Certificate | *Completed: 2026* | *Verification https://www.credly.com/badges/ed2cfba0-db30-4e37-a006-5c606f96e634/public_url*

GED | *January 2005 – Garland High School*

Technical Projects & Artifacts

- **Intrusion Detection & Traffic Analysis:** Conducted deep packet inspection using **Wireshark** and **tcpdump** to identify unauthorized access attempts and malicious network traffic patterns.
- **Automated Security Scripting (Python):** Developed **Python scripts** to automate repetitive security tasks, including parsing system logs and managing user access permissions.
- **Security Auditing & Compliance:** Performed internal security audits of simulated organizations, mapping vulnerabilities to **NIST CSF** controls and documenting risk mitigation strategies.
- **SIEM Monitoring & Analysis:** Utilized **Splunk** and **Google Chronicle** to monitor security events, analyze alerts, and investigate potential indicators of compromise (IoC).
- **Database Forensics:** Leveraged **SQL** to audit database transactions and authentication logs, isolating critical data points for forensic investigations.
