

Cody Marshall

Logic Architect | Cybersecurity Professional

MISSION PROFILE

Experienced professional transitioning from 20 years retail operations into Cybersecurity, leveraging a proven background in high-pressure compliance, risk assessment, and systematic problem-solving. Currently completing the Google Cybersecurity Professional Certificate and maintaining a 92% overall average across all technical modules.

TECHNICAL CORE

I have established a rigorous technical foundation focused on infrastructure protection and threat detection. My current technical stack includes:

- Data Analysis: SQL for log auditing and database security.
- Automation: Python for scripting and security task optimization.
- Environment: Linux command-line operations and system hardening.
- Frameworks: NIST RMF, SIEM tools, and Incident Response protocols.

STRATEGIC GOALS

With the core technical phases complete Google Cybersecurity (C1-C7), I am currently finalizing my professional portfolio and preparing for the CompTIA Security+ (Target: May 2026). I am eager to apply my attention to detail and dedication to security as a Security Analyst within the DFW tech corridor.
